Introduction

Using tulle, we represented potential sea rise level by the latter half of the 21st century and the top 3 pollutants that pollute the air. With these bad factors, they are putting everyone's lives in danger.

Why is air pollution/sea level rise important?

Air pollution and sea level rise is a big danger to East Boston. It is important to learn and educate ourselves and others. If action isn't taken to address this problem, buildings will be flooded, the health of the community will be damaged, and their homes will have to be relocated.

Pictures at Maverick Square:

What can **we** do about these issues?

We can:

- educate ourselves and others
- spread our knowledge to the community and the world around us
- contact government officials to advocate for action
